# A Tradition of Quality

Since 1982

THE COMPLETE SOURCE FOR INTERIOR DESIGN!

## rock solid

West Windsor homeowners Liz and Pat Boyle liked the idea of incorporating a fireplace into their outdoor living space for "the look and warmth it gives the area," Pat Boyle says, adding that it's fun and relaxing for entertaining. "The kids love to roast marshmallows over the open fire." Made of Golden Quartzite veneer, the wood-burning fireplace calls to mind a remnant from an old farmhouse, the source of Pat Boyle's inspiration. The cream travertine patio and walls help define the outdoor room and lead to a gazebo, which includes a TV and entertainment armoire, says designer Suzette Donleavy of Well-Designed Interiors.
